

Harika Reddy  
python programming

## EDUCATION

2026

kakinada institute of  
engineering and  
technology

B.tech  
7.6

## Project

feedback : Make sure you point out what is positive about someone's work before focusing on what needs improvement. People are less likely to get defensive when you appreciate their strengths and successes. For example: When giving feedback on a report, you can write: "Great job including all the facts in this report!"
